

**REMARKS:**

This amendment corrects an error found in claim 8. In particular, the recitation of "an n-channel resistor" has been corrected to read "an n-channel transistor" as it is well known in the art that the descriptor n-channel refers to a transistor, not a resistor. Moreover, the specification as originally filed supports this correction; the examiner is respectfully directed to page seven, lines 22-23.

There have been no changes to the scope of the claims or the disclosure in this amendment. This amendment is needed for proper disclosure or protection of the invention, and requires no substantial amount of additional work on the part of the Office. This amendment after allowance is being filed on or before the date the issue fee is paid.

Entry of this amendment without withdrawing the application from issuance is respectfully requested at the Examiner's earliest convenience.

Respectfully submitted,
